MEANINGFUL USE

Costs and Limitations

ONC Certified HIT
2014 EDITION

GetWellNetwork Platform PLS 5.2 and GetWellNetwork Ambulatory 1.5 have met the requirements for ONC-ACB 2014 Edition Modular Inpatient EHR Certification and Modular Ambulatory EHR Certification, respectively, which engages patients in their care and streamlines clinical workflows in the acute setting, leading to improved outcomes in patient satisfaction, health and safety, and finance and operations. The IPC solution receives both manual and automatically generated orders from an EHR and assigns relevant, patient-specific education to enable patients and their families to take a more active role in their health. Hospitals can include GetWellNetwork's Modular Certification in their meaningful use attestation to meet or help meet requirements for patient-specific Education.

Drummond Group's ONC-ACB certification program certifies that EHRs meet the meaningful use criteria for eligible provider or hospital technology. In turn, health care providers using the technology of certified vendors are qualified to receive federal stimulus monies upon demonstrating meaningful use of the technology – a key component of the federal government's push to improve clinical care delivery through the adoption and effective use of EHRs by U.S. health care providers.

> "The certification of our technology delivers additional value on our client community's investment in IPC," said David Muntz, senior vice president and chief information officer at GetWellNetwork. "For more than a decade, leading health care providers have been using GetWellNetwork to engage patients and families for better health outcomes and performance improvement. Now our inpatient solution can also be used as a strategic tool for incentive payment eligibility."

To learn more about meaningful use and how GetWellNetwork can help hospitals and providers meet the meaningful use requirements for patient specific education, please contact your GetWellNetwork representative.

There is an initial cost for the GetWellNetwork core system, which includes a one-time implementation fee & hardware expense and an annual subscription fee based on the negotiated contract price.

An EHR integration is required in order to implement this certified product. A one-time cost may be required to establish the interfaces for transmitting relevant EHR codes, such as Problem, Medication and Lab codes, to the GetWellNetwork system for the purposes of identifying and assigning Patient Specific Education to each eligible patient.(170.314(a)(15); 170.314(g)(1,4)).

If a request is made by the hospital or clinic to utilize additional or alternate education resources within this certified product-version, a third party education vendor may require additional annual subscription fee(s). These fees would be paid by the client and made directly to the third party education vendor. This includes additional/alternate education content for InfoButton resources as well as educational content that fall outside the GetWellNetwork core package.

Additional or alternate education resources are not required to use the GetWellNetwork certified product for Patient Specific Education.

There are no known technical or practical limitations of this certified product.

This EHR Module is 2014 Edition compliant and has been certified by an ONC-ACB in accordance with the applicable certification criteria adopted by the Secretary of the U.S. Department of Health and Human Services. This certification does not represent an endorsement by the U.S. Department of Health and Human Services.

On July 21, 2014, GetWellNetwork Platform PLS 5.2 received certificate no. 07212014-2754-9 for meeting the following criteria: 170.314(a)(15); 170.314(g)(1, 4). Additional software used: OpenInfobutton. On October 30, 2014, GetWellNetwork Ambulatory 1.5 received certificate no. 10302014-2958-6. Modules tested: 170.314 (a)(15); (g)(1, 4. Additional software used: OpenInfoButton.

About GetWellNetwork

GetWellNetwork®, Inc. provides patient engagement solutions that help health care providers engage, educate and empower patients along the care continuum. Our patient-centered platform, delivered across multiple technology platforms including mobile devices, computers and televisions, enables providers to implement a revolutionary care delivery model called Interactive Patient Care™ to improve performance and patient outcomes. The company further extends the value of existing IT investments by integrating seamlessly with electronic medical record and patient portal applications.

GetWellNetwork is recognized by KLAS® as the leader in the Interactive Patient Systems category and exclusively endorsed by the American Hospital Association. Learn more at getwellnetwork.com.

About Drummond Group Inc.

Drummond Group Inc. is a global software test and certification lab that serves a wide range of vertical industries. In healthcare, Drummond Group tests and certifies Controlled Substance Ordering Systems (CSOS), Electronic Prescription of Controlled Substances (EPCS) software and processes, and Electronic Health Records (EHRs)—designating the trusted test lab as the only third-party certifier of all three initiatives designed to move the industry toward a digital future. Founded in 1999, and accredited for the Office of the National Coordinator HIT Certification Program as an Authorized Certification Body (ACB) and an Accredited Test Lab (ATL), Drummond Group continues to build upon its deep experience and expertise necessary to deliver reliable and cost-effective services.
